# Gantry Solutions

## You're in safe hands with ATF

Welcome to ATF, the Australian owned, market leader in the supply of quality solutions for height safety and temporary fencing. For over 20 years throughout Australia and New Zealand, ATF has built a reputation for delivering an extensive range of smarter safety solutions, through superior product quality, backup and service. Whether you're in mining, civil, residential, government, industrial, commercial, maintenance or events industries, ATF has the product range, knowledge and experience to manage your project from pre-planning to completion. We appoint a Client Manager to work closely with you to tailor a solution to suit your needs, someone who understands local compliance issues, someone who will help you meet your critical construction or event schedules saving your company costly delays and importantly, unwanted injury. All ATF equipment is locally made and rigorously tested to meet the highest Australian standards and the toughest conditions. For all your height safety and temporary fencing solutions, don't compromise, talk to ATF today.

1

Site sheds can be installed to the top of gantry.

2

The structure is ideally suited to any site configuration

3

Gantry can be installed to accommodate walkways that span across multiple levels

4

Gantry applications for high pedestrian traffic flow

## Why choose ATF Gantry Solutions?

ATF Gantry Systems are engineered to provide a quick and efficient overhead gantry, perfect for all surfaces, perfect for any business operating in the construction industry but versatile enough to be used for civil sites, events and any other site requiring public restriction. The system is fully hot-dipped galvanized to provide a clean, attractive finish. Our portable system can be installed quickly and efficiently in any shape or form to suit your site, with gates and vehicle access available, additionally cantilevers and stairs can be installed to provide site shed access.

- Site sheds can be installed to the top of gantry
- You can also install scaffold up the building, using gantry as a base
- ATF Gantry System is designed and manufactured in Australia
- They have a 10kpa rating for overhead protection
- Flexibility of use to suit most site requirements

ATF offer short and long term hire with the system ideally suited for use on:

- Construction sites
- Civil sites
- Concerts / Events
- Any site and public restriction area

### Key Benefits and Features:

- The ATF Gantry System is 5.1m in length and 2.4m in width
- All gantries are fully height adjustable to suit all site conditions or obstacles and can be set to a total height of up to 4.2m
- Our standard Gantry System is designed to accommodate site sheds with clients having the option of a 900mm or 1800mm cantilevered walkway
- For more difficult sites ATF can customise a Structural Gantry to suit your site requirements
- Vehicle and personnel access gates can be custom made to suit your site requirements

## Safety Focus

As the market leader in the fencing and height safety industry in Australia and New Zealand, ATF is always striving to improve our products and services with safety in mind. We have redesigned our standard Gantry System to enable all gantry decks to be installed harness free. Through re-engineering we have been able to greatly increase the safety of our installation and site staff while installing our product.
