Milperra, NSW 1891

Dear Alex,

RE: Integrity Worldwide Inc. Speed Post as Movement Restraint

The Speed Post has been tested by PearlStreet, 6 Nello Place Wetherill Park, NSW 2164, Test report Number: 27997539, Dated July 31, 2009, and is now certified as a single point movement restraint post.

The purpose of a single point movement restraint post is to limit the movement of a person when connected to a single Speed Post by a belt or harness combined with a line such that the person is not able to move sufficiently close to an unprotected edge where a fall could be possible. The Speed Post is not rated for fall restraint.

Yours sincerely,

D. W. Crawford BE (NSW), ASTC
